Aqua Pharmaceuticals, LLC Acquires FLUOROPLEX (fluorouracil) 1% Topical Cream®

West Chester, PA – January 9, 2012

West Chester-based Aqua Pharmaceuticals, LLC today announced the acquisition of FLUOROPLEX® (fluorouracil) 1% Topical Cream from Allergan, Inc. FLUOROPLEX® is a topical cream indicated for the treatment of multiple actinic (solar) keratoses (small red or skin-color growths) that appear as a result of overexposure to the sun. Aqua will assume control of all manufacturing and distribution, as well as promotion of the product through its own national dermatology-focused sales force.

“Since early 2009, we have co-promoted the product with our partner, Allergan. We are even more excited to have full rights to FLUOROPLEX® in our product line”, said Jay Gooding, CEO for Aqua. The prescription product complements the existing line of CORDRAN® (flurandrenolide) topical steroids, MONODOX® (doxycycline monohydrate capsules) oral antibiotics, and XOLOGEL® (ketoconazole USP) Gel, 2%.

FLUOROPLEX® (fluorouracil) 1% Topical Cream is an antineoplastic/antimetabolite product for dermatological use. The product is indicated for the topical treatment of multiple actinic (solar) keratoses.

Important Safety Information Regarding FLUOROPLEX 1% Cream

- Fluorouracil is contraindicated in women who are or may become pregnant.
- This product should not be used by patients who are allergic to any of its ingredients.
- There exists the potential for a delayed hypersensitivity reaction to fluorouracil. Patch testing to prove hypersensitivity may be inconclusive.
- If an occlusive dressing is used, there may be an increase in the incidence of inflammatory reactions in the adjacent normal skin.
- The patient should avoid prolonged exposure to sunlight or other forms of ultraviolet irradiation during treatment with FLUOROPLEX® Topical Cream, as the intensity of the reaction may be increased.
- Pain, pruritus, burning, irritation, inflammation, allergic contact dermatitis and telangiectasia have been reported. Occasionally, hyperpigmentation and scarring have also been reported.
